

Private Leadership Alignment Workshop

A facilitated half-day for up to six leaders whose AI deployment or GTM problem crosses functions, authority, or competing definitions of what is actually wrong.

Starting at \$5,000

What is included

Leadership pre-work	Relevant leaders document the constraint, decisions, dependencies, and competing explanations.
Sponsor scoping	Confirm the decision the workshop must produce and who must be in the room.
Facilitated half-day	Work through constraint, authority, dependencies, sequence, and tradeoffs.
Leadership decision record	Receive the decisions, rights, owners, immediate moves, waits, risks, and escalation path.

The decisions it produces

One constraint

The operating constraint leadership agrees to solve first.

Decision rights

Who decides, contributes, can stop the work, and receives escalation.

Operating sequence

The first 30 days and the dependencies that cannot be skipped.

Evidence

The measure and behavioral evidence leadership will review.

Open risk

What remains unresolved, who owns it, and by when.

What it is not

- Not generic team training.
- Not an awareness workshop or ideation exercise.
- Not implementation, stakeholder research, or a full transformation roadmap.

Put the right people in the room.

The fit call confirms the decision, participants, preparation, and whether a half-day is sufficient.
